COMMITTED TO QUALITY, ROOTED IN COMMUNITY

Preparing for Your Roof Installation with KYCO

Thank you for choosing KYCO Exteriors to install your new roof. We're excited to get started and are committed to delivering high-quality results that protect and enhance your home for years to come. To ensure the process goes smoothly, safely, and efficiently, we kindly ask for your help in preparing your property ahead of our arrival.

How You Can Prepare

Move Vehicles
Please move any vehicles from the driveway or areas close to the house. This provides our crew with easy access and protects your vehicles from potential debris. Additionally, a dumpster may be placed in your driveway to collect discarded materials—make sure your vehicle is not in the garage, as the dumpster could block it in.

Provide Access
Ensure that gates, doors, or other entry points to your property are unlocked or otherwise accessible to our team.

Clear the Area
If possible, remove any fragile or valuable items from patios, decks, or areas surrounding your home. This helps prevent accidental damage during the roofing process.

Lawn and Landscaping
While we take care to minimize disruption, roofing work can impact landscaping close to the home. We recommend moving potted plants, patio furniture, garden décor, and any other items you'd like to protect from potential damage. Please notify us if you have any irrigation lines or sprinkler heads near the house.

Protect Personal Belongings
We recommend covering any items stored in your attic, as debris or dust may enter the space while we work on your roof.

Pets and Children
For their safety, please keep pets and children indoors or away from the work area throughout the duration of the project.

Additional Information

Noise and Vibration Notice
Roofing work generates significant noise and vibration. We recommend securing delicate wall-mounted items inside your home and notifying household members who may be working or staying indoors during the project.

Weather Considerations
Roofing projects are subject to weather conditions. If inclement weather occurs, it may delay the project. We will communicate any changes in schedule promptly and keep you updated throughout the process.

Satellite Dishes & Rooftop Equipment
If your roof includes satellite dishes, solar panels, or other rooftop equipment, please let us know in advance. These may need to be temporarily removed or repositioned during the installation process.

Project Timeline
Most standard roof installations are completed within 1–3 days, weather permitting. Larger or more complex projects may take additional time. Your project manager will provide updates throughout the job and inform you of any schedule adjustments.

Post-Project Cleanup
After your roof is installed, our team performs a thorough site cleanup, including magnetic sweeping for nails and removal of debris. We aim to leave your property as clean as we found it. If you notice anything we missed, please let us know—we'll make it right.

Homeowner Responsibilities
Please notify all household members, tenants, or guests about the roofing project. Also, ensure any alarm systems, motion detectors, or timed sprinklers are adjusted or turned off as needed to allow for uninterrupted work. If you have any special concerns or site-specific information (like pets, hazards, or access challenges), please let us know ahead of time.

Staying in Touch

We'll keep you updated on our progress and notify you right away if any unexpected issues arise. If you have any questions or concerns before or during the installation, please feel free to reach out:
